

BYOD Policy

Preamble

Mill Park Secondary College values the rich learning experiences that integrated interactions with technology bring. The Bring Your Own Device (BYOD) program is a critical step towards meeting the dynamic needs of our students and empowering students with direct involvement in the way digital technologies are used in their learning.

Aim

- To allow students to use an approved device to access the College wireless network and software for educational purposes.
 - To enable students to use technology to further their learning independently and in structured lessons.
 - To enable students to develop skills and behaviours reflective of responsible digital citizens.
-

Implementation

Mill Park Secondary College will:

- Implement an Equity Policy to ensure students have access to a computing resource.
 - Provide a BYOD User Agreement to list the responsibilities and expectations of each student and their families in the BYOD program. This Agreement will be made available and sighted each time a student logs onto wireless network.
 - Publish a Device Specification Guide that indicates the minimum requirements for devices.
 - Accept no responsibility for loss or damage to, or for maintenance or repair required in a student's own device through any act or omission resulting from the negligence or otherwise of the school, a member of the school staff or of another student.
